

St Catherine's British School

Building a school for the leaders of tomorrow

CALL FOR EXPRESSIONS OF INTEREST

Deadline: 16th November 2017

St Catherine's British School is taking the next step in realising their exciting vision for a brand new school in the northern suburbs of Athens. The Project Management team is now inviting companies who may wish to tender for this major construction contract to submit an expression of interest.

The project is the redevelopment of an abandoned industrial facility on a brownfield site – the former Macsolar factory in Kifissia - into an 'energy efficient' school housing both primary and secondary education facilities. The area of the new building is approximately 13,000m² and the construction works will comprise:

- Extensive structural strengthening
- Architectural works
- MEP works

Project commencement is planned by the end of the current year and will last approximately nine months.

Tenders are invited from construction companies who meet the following criteria:

- Revenues earned from building projects of more than €20,000,000 per year
- Proven experience in major building projects
- Ability to provide substantial guarantees for deadlines and quality
- A base in Athens
- Experience in educational projects desirable

Interested parties should contact the school's project consultants, Focal Project Management for details of how to submit an interest.
